

March 11, 2011

Howdy folks,

In the past 3 newsletters Steven Hairfield wrote about coming earth changes. Considering the things that have been happening including the earthquakes, seems he was on the right track.

Just want to offer a few suggestions to you folks about things that are affecting many of you.

At the equator, the sun comes up at about the same place throughout the year. In Canada it is farther North in the Summer and farther South in the Winter. The Winter days are shorter and the Summer days are longer. Most folks know this. So---the farther North, the wider the range of sunrises.

Since the sun rose farther North last Summer and farther South this Winter here in Virginia, it seems reasonable to say something changed—something like the earth tilted.

There have been a lot of earthquakes including the one this morning in Japan. Now if there is enough stress in the earth to cause a quake doesn't it make sense that it would also affect us?

Am finding a lot of people and places that are affected by geopathic stress. Near as I can tell, this is affecting the energy and behavior of people, perhaps in many ways.

Use your dowsing and ask 'What is the effect of geopathic stress upon me and upon my home?'

If it is on the minus side of your dowsing chart, then simply ask to neutralize the negative effect upon you and your home and the pendulum will swing counter-clockwise.

You may have to do this every day. Lots of folks seem to think that energy work last a lifetime --but it doesn't.

Most civilized people take a bath every day, so doesn't it make sense to also clean up your energy field every day?

Seems the polarity of the earth is out of balance too so it also affects the polarity

of your body and home. Be sure to balance your polarity and bring yourself into balance with Universal Energy.

These 3 simple things can make a big difference in your energy level and the way you feel. Just remember, you are an intelligent human being and have the ability to transform energy, so make the most of it.

TAKE RESPONSIBILITY FOR YOURSELF

Now folks I like to keep things simple and share information with all of you who are really trying to make a difference, so do me a favor and stop asking me to stop hurricanes, floods, earthquakes and natural events.

Yes, have taught some friends how to stop storms that would destroy crops—and it worked. My friend Joe Smith, a well know dowser who went to the Spirit world this past Summer, used a trick I taught him and he was successful. Here is his story as best I remember it. I had told the story about my friend Chief Two Trees telling me about sticking a double bit axe in the ground to split the clouds and stop the rain. I had done the same thing by sticking a knife handle in the ground with the blade pointed to the sky. Joe listened and paid attention.

Joe said there was a big hail storm coming toward his farm and he stuck an axe in the ground to split the storm. The hail beat the crops into the ground on the surrounding farms and Joe's place just got a good rain.

Lesson to be learned: Joe didn't email or call and ask me if he could do it, he didn't ask where to get an axe, he didn't ask what color the handle needed to be, he didn't ask what the neighbors would think, he didn't ask if the preacher would approve---HE JUST DID IT. AND IT WORKED.

From the first day you went to school or to church or to the army, you learned something. You learned that you didn't have any personal power. You learned that you had to ask someone for permission for everything you did.

If you have to ask someone for permission, then you are giving your power to them instead of keeping it for yourself. Most people have been trained this way.

This is the good thing about dowsing, you don't need to buy a permit and you don't leave any tracks.

NATURAL DISASTERS

People build towns in flood plains and eventually they will get flooded. There was a major earthquake along the Mississippi River in 1811. There have been earthquakes in California before the white man ever arrived. This is common knowledge, yet skyscrapers are built in these areas.

Seems like when floods come and the earth shakes people want to blame someone. It's like humans expect the earth and nature to change to accommodate their convenience. It ain't happened yet and ain't likely to.

**THE TIME HAS COME FOR EACH OF US TO TAKE RESPONSIBILITY FOR OURSELVES,
BE SURE TO TAKE ADVANTAGE OF THE OPPORTUNITY.**

I APPRECIATE YOU!!!!

Raymon

And yes.....it is that time again and we appreciate you joining with us for A Call to Action. March 20, 8 P.M. Local time, where ever you may be in the world. For full details....[click here](#).

Raymon recently did an interview that will air on The Edgar Cayce Internet Radio program Reflections. It is scheduled to air on Sunday, April 3 at 9:00 am EST with an encore on Sunday, April 10 at 10:00 am EST. It will be available for download at the end of April. The links to listen are at www.edgarcayce.org/radio.

Raymon will be opening the Coptic Conference in Bristol, VA the 16th of April, details are [here](#). (And I have to tell you I will be playing gongs there also, so come play!) And he will be teaching a class at Skye Island in Alabama on the 1st of April. [Details are here](#).

We appreciate you!

**With joy and laughter,
Faye**
